## ABOUT ME

Shortly after getting married my wife and I sat down and talked about how we wanted to keep track of our spending, and decided to look for a budget app. At the time no app existed with the features we wanted, so we decided to try our hand at making our own.

Ultimately we ended up creating a spreadsheet with google that did the trick for us, but I never stopped thinking about what it would take to get into tech.

Eventually, I decided to attend Nashville Software School. I love studying languages; before beginning my journey into the tech field I spent time as a foreign language instructor, and I have absolutely loved learning new programming languages. I look forward to being in a field where continual learning will give me the opportunity to always grow and challenge myself.

---

## PROJECTS

### Publish Or Perish (POP)

Publish Or Perish is an application for short story writers to help keep track of their stories and, most importantly, their submissions. As a writer myself, this was a tool I had long desired but had not found anything like it on the market, so I decided to build it.

Users are able to quickly see information about publication magazines, track their own submissions to said magazines, and record notes for their specific writing projects.

- Created using React.js
- Implements full CRUD functionality
- UI styled with CSS3

<https://github.com/mcampopiano/publish-or-perish>

---

## TECHNICAL SKILLS

- HTML5
- CSS3, Bootstrap
- JavaScript, React.js
- JSON Server
- Git/GitHub

## TECHNICAL EXPERIENCE

### APPRENTICE SOFTWARE DEVELOPER

**Nashville Software School Sep 2020 – Mar 2021**

Intensive full-time 6-month software development bootcamp anchoring learning with both individual and team-based projects. Tech Stack: Python/ Django; React.js; Javascript; HTML5; CSS3; SQL fundamentals.

### In addition to the syntax involved with the various programming languages:

- Practiced the process of planning for a project, including wireframing, creating a dependency graph, Entity Relationship Diagram, and detailed tickets for features;
- Used GitHub to backup code both for individual and group projects. This flow included: creating and cloning repositories, pushing/pulling to and from the local repository, checking out branches for features, making commits, and resolving merge conflicts with Main branch as they arose.
- Gained firsthand experience developing web applications both as part of a team and as an individual.
- Participated in SCRUM framework for accomplishing group projects.

### Group projects

#### Holiday Road

This project was to build an application which helps users with specific requirements plan a road trip to a National Park, using Nashville as a starting point. My group's target audience were wheelchair users who don't want to rely on asking for assistance.

- In this project, we used multiple external API's, including the National Park Service API
- The single-page app was developed using Vanilla JavaScript

### Nutshell

Nutshell is a basic social media application which allows users to

- Send and receive both public and private messages
- Create events and view friends events
- Log tasks and mark them completed
- My main tasks during this project were to develop the functionality for creating new events and tasks,
- Dynamically render those tasks to the DOM if they were incomplete
- Have them disappear from the active tasks and display in a completed task section once the user clicks a radio button marking the task complete

## PROFESSIONAL EXPERIENCE

### FREELANCE ENGLISH AS A SECOND LANGUAGE INSTRUCTOR (Italy) 02/2019 – 06/2020

Worked as a private language instructor, with an emphasis on teaching not only the syntax but the process of learning a new language.

### TECNOTILES, INC (LEBANON, TN) 07/2017–01/2019

#### OPERATIONS MANAGER

TecnoTiles was an Italian owned tile processing company which receives large sheets of tile from customers then cuts them down to the desired dimensions. They reached out to me because of my Italian language proficiency and management experience. The company was sold in January 2019 and is now called ExactaTiles.

Job duties included:

- Managing and tracking daily operations through an excel program
- Assisting in the management of warehouse staff
- Translating between Italian and English as necessary

### SIMMONS BANK (FRANKLIN, TN) 01/2016–10/2016, 01/2017–07/2017

#### CONSUMER LENDING SPECIALIST

- Processed Real Estate Loan applications as part of a collaborative team
- Worked on a strict deadline basis
- After seeing that the many different steps of the process could be broken down into distinct sections of work, suggested that the department move to an assembly line type working style where teams specialized in specific parts of the process.
- Once this assembly line model was adopted, the department saw more success both in meeting deadlines and customer satisfaction

### BOOKS-A-MILLION (Mount Juliet, TN) 08/2015–12/2015, 10/2016–12/2016

#### Co-Manager

I was hired as a book seller in 2015 then in 2016 asked to return as a co-manager to help through the holiday period.

### PEYRON-RE UMBERTO I SCUOLA COMPRENSIVO (Italy) 01/2015–07/2015

#### English Language Instructor

In January I began a three-month contract as a teaching assistant, which was extended to six-months and I was given my own classes to teach.

### TIMESHARE ADVOCACY INTERNATIONAL (MOUNT JULIET, TN) 01/2014–12/2014

#### Credit Department Head

TAI was company which helped clients who felt they had been misled into buying a timeshare cancel their contracts. When I arrived the department was dealing with a several months' long back-log of voicemails and emails, which had led to a period of quick turnover before my arrival. I implemented a system of daily building out a task list of what could reasonably be accomplished within a day if we pushed ourselves, and within three months of steady working the department was caught up. The company was sold in January of 2015.

Job duties included:

- Overseeing the work of the department, including the interviewing and hiring of staff
- Working directly with clients and the three main credit reporting agencies to clear delinquencies on timeshare payments incurred as part of the cancellation process

### US BANK (BRENTWOOD, TN) 02/2012–12/2013

#### Assistant Branch Manager

My former manager from SunTrust contacted me and offered a position as a personal banker. I was subsequently promoted to senior banker and then assistant manager.

### SunTrust Bank (Green Hills, TN) 03/2011–02/2012

#### Financial Services Representative

I was hired as a teller and subsequently promoted to an FSR

---

## EDUCATION

### NASHVILLE SOFTWARE SCHOOL

Intensive Full stack Development bootcamp

### International TEFL Academy

Received a Teaching English as a Foreign Language Certificate

### MIDDLE TENNESSEE STATE UNIVERSITY

2014–2016
